

LabTech

Antivirus Solution

Overview

An increasing challenge for today's IT solution providers is delivering and managing effective protection against online threats and malicious software attacks to customers with different antivirus products.

Onboarding new customer locations with or without an existing antivirus solution, administrative difficulties with separate antivirus consoles, and lack of automated best practices security updates further complicates IT threat prevention, detection and management.

True to its word, LabTech Software continues to deliver innovative and vendor-agnostic solutions driven by the day-to-day needs of IT service administrators and the managed service

provider (MSP) community. Experience teaches us that "one size does not fit all" when you need to deliver complete, comprehensive coverage regardless of your customers' environment.

LabTech Software has teamed up with some of the most widely used and best rated threat management solution providers to offer you the ability to choose exactly what you need to provide efficient and effective online or offline threat protection and management. LabTech's "single-pane-of-glass" Multivendor Antivirus Management Dashboard reduces administrative burdens ensuring you enhanced service quality, productivity and profitability.

Features

AVG Integration

Our integration with AVG delivers antivirus protection that updates automatically providing your customers with dependable coverage from continually evolving threats. AVG will also keep your customers clear of spam and provide protection from phishing scams along with the hidden viruses that they contain. Threats and business disruptions to customers from files exchanged through instant messaging is also minimized.

ESET Integration

LabTech integrates with ESET Nod32 antivirus to provide a combination of powerful management tools, impressive performance, and state-of-the-art proactive threat detection. Protect your customers' valuable data and ensure

regulatory compliance with the award-winning ESET antivirus solution. Deliver proactive antivirus and antispyware protection without affecting customers' networks performance, while offering business-grade management control.

VIPRE Integration

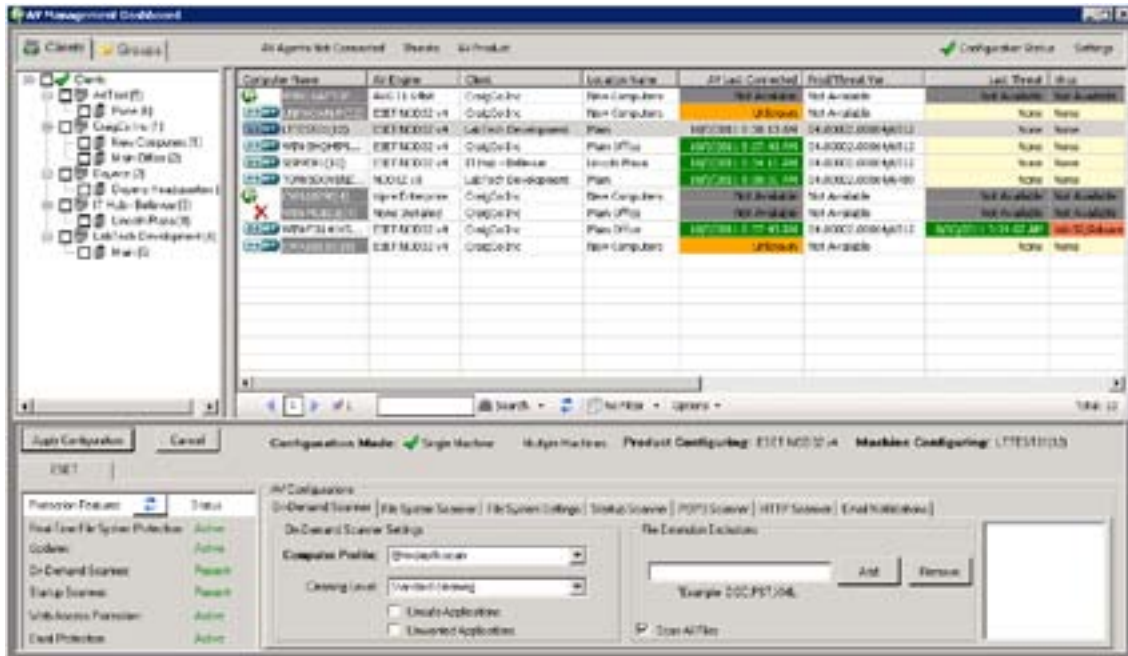

LabTech integrates with VIPRE® antivirus to delivers fast and efficient online security with low impact on system resources. Built from the ground up after years of research and development, VIPRE is cost-effective, reliable, easy-to-use and easy to maintain – the perfect antivirus solution for your business. With VIPRE you can also thoroughly remove your previous antivirus product to avoid conflicts during installation.

Multivendor Antivirus Management Dashboard

The ever-competitive antivirus marketplace often offers promotional pricing resulting in different products deployed across multiple customer sites and an array of un-integrated antivirus management consoles. Simply onboarding new customer compounds the situation. With LabTech's Multivendor Antivirus Management Dashboard now you can manage multiple vendors, across multiple sites.

Centralized Endpoint Protection

Proactively monitor the health and status of all major antivirus products in your customers' environment. Deliver fast, dependable and safe antivirus software deployment, monitoring and management from a single screen. (Expanded feature set capabilities for ESET antivirus).

Manage multiple vendors, across multiple sites with LabTech's Multivendor Antivirus Management Dashboard.

Benefits

LabTech's antivirus solution empowers today's IT solution providers and MSPs with a tool that allows for efficient and proactive management of a variety of antivirus products across multiple customer sites. Deliver superior antivirus protection and management services from online threats to your customers' data integrity and network security with an antivirus solution from LabTech Software.
